DC141

Contact

Self-Adhesive Contact

The DC141 magnetic contact saves installation time through the use of a 3M adhesive tape. The tape which establishes a permanent bond between the contact and the surface, can be repositioned during the first 5 minutes. A low profile and small footprint combine with reliable technology make the DC141 the perfect magnetic contact for those situations where drilling holes are impractical.

Details

- Quick tape mounting; no screw or glues needed
- Urethane/acrylic tape bonding improves with age
- Convenient surface mounting
- Standard 2 m wire length
- Tamper loop provided
