ATS626

Plug-in output expander, 16-way

Sixteen way plug-in output expander

The ATS626 offers a sixteen way output expansion to Advisor Advanced panels. To reduce required space in the Main control panel housing, the unit is a plug-in to the Main Control panel PCB.
The ATS626 provides for eight Open Collector outputs available through screw terminals, one being a high-current output. In addition it provides for eight open collector outputs through flying leads or as a relay when using ATS1810 four way relay cards. The output function is defined through the output configuration in the main control panel.

Details

- Expand Axon and Advisor Advanced panels with 8-open collector outputs on the PCB
- Expand with max 8-relay outputs using 2 x ATS1810 4-way relay card
- 1 high current output (1A)
- Open collector output max 50 mA
- Plug-in to Axon and Advisor Advanced panels
